Richard,

If you can come for 10:00, that would be great since we already have an internal EE meeting planned (as Scott pointed out....thanks!) Our meeting is in B1D.

I am taking Tuesday off, but am free all times on Wednesday through Friday. I would say pick a Wednesday time, and I will be there.

Just an FYI that we have an internal EE meeting on Wednesday from 10:00-11:00, so perhaps it would be logical to incorporate this information into that meeting (if Richard is available at that time).

On Thu, Dec 28, 2017 at 3:05 PM, Pierce - CDPHE, Gordon <gordon.pierce@state.co.us> wrote:

Richard,

We have been working on the wildfire smoke-influenced ozone exceptional events for 9/2/17 and 9/4/17. Amber has developed a summary PDF of the 2 events, attached.

Summary: Washoe and MA/CT, as well as others, have WF-O3 EE demos approved/concurred using "Tier 2+",

ED\_002666\_00018581-00001

with  $Q/d < 100$ . These events only dealt with one wildfire, and stacked multiple days of emissions. For Colorado's 9/2 & 9/4 exceedances, we have 6 monitors at/over 71 ppb, and 3 additional monitors over 68 ppb. For 9/2, we have calculated cumulative (stacked days and fires)  $Q/d = 261$ ; and for 9/4,  $Q/d = 240$ . If we just use one fire and stack multiple days (like Washoe), we get  $Q/d = 213$  for 9/2 (Sartin Draw Fire), and 124 for 9/4 (Rice Ridge Fire). Hence, the  $Q/d > 100$  threshold is met either way.

So, we would like to meet with you, or have a conference call, to discuss what you envision being in a final TSD for the events. We have a lot of info, but probably way more than is really needed. That being said, we know there are going to be a lot of eyes on this.

Do we include all the supporting evidence even though we have met the  $Q/d$  criteria? If so, can we put that documentation into an appendix (vs within the TSD)? Any suggestions/advice on moving forward with writing up the report? Would it be appropriate for us to work with Kirk Baker to ensure our  $Q/d$  treatment is adequate?

If you have some time next week for a meeting/call, that would be great. Times that currently look good on our end are:

Tues 1/2 in AM

Wed 1/3 from 11:00-1:00

Thurs 1/4 in PM (maybe AM if needed)

Fri 1/5

Thanks,

Gordon
